intention

Within the framework of the EU Programme for Lifelong Learning, the intention of this project is to enable LIS students to gain the theoretical and practical skills for necessary, logistical, technological, classification, construction, and security solutions.

concept

Architectural and technological processes are parts of the project discussions, workshops and excursions, as well as are specific issues like public relations, information literacy and modern library services.

benefit

The intention of this project is to support efficient and multinational professional training. It enhances the international co-operation among institutions in the areas of teaching, research and practical experience.
